Model 6082

**Multi-Battery Series Charger
6A 1-36 Cells**

6082 Features

- Industry standard with up to 158-volt continuous output at 6 amps
- Charges up to ten 12V batteries at 6 amps
- State-of-the-art, anti-spark safety delay
- Voltage is shut-off when current is interrupted, eliminating sparking and provides additional protection when charging ten batteries
- Isolated transformer with full wave silicon rectifier
- Output current can be smoothly adjusted over full range with the front panel control
- Polarity protection for operator and equipment safety
- Charges ALL 12V battery types
- Includes NINE charging leads (P/N 611095)
- 1-Year Bumper to Bumper Warranty
- **Made in USA** of US and Global Components
